General Description of the Purkeville Hydropathic Institute

General Description of the Parkeville Hydropathic Institute. The main building is three stories high, standing back from the street about one hundred feet, with a semicircular grass plot in front, and contains thirty to forty rooms. The grounds around the house are tastefully laid out with walks and planted with trees, shrubs, &c. On the left of the entrance to these grounds is a cottage containing four rooms, used by male patients as a bathing house, with every convenience for "packing," bathing, &c.; on the right of the entrance, about two hundred feet distant, stands a similar cottage, used by the ladies for similar purposes.

The hydrant water is introduced into these cottages as well as into the main building, and all the waste water carried off by drains under ground.

well as into the main building, and all the waste water carried off by drains under ground.

THE WATER WORKS

Consist of a circular stone building, standing on the brow of a hill, surmounted by a large cedar reservoir containing five hundred barrels, brought from a never-failing spring of pure cold water in the side of the hill, by "a hydraulic ram," a self-acting machine of cast iron, that is kept constantly going, night and day, by the descent of the water from the spring. The surplus water is carried from the reservoir to a fountain in the water-works yard, surrounded by weeping willows. In the first story of the water-works is a circular room, containing the douche bath, which is a stream falling from a height of about thirty feet, and can be varied in size from half an inch to an inch and a half in diameter. Adjoining the douche room is a dressing room, with marble tables, &c.: the rising douche (for the cure of piles, &c.) is one of the most complete contrivances of the kind, being entirely under the control of the patient using the same.

There are many other appliances, which can be better understood by a personal examination.

wanted to circulate the following new and beautiful orks, (retail price, \$2 50 per vol.) A new and complete PICTORIAL HISTORY OF CHINA AND INDIA;

PICTORIAL HISTORY OF CHINA AND INDIA; with a descriptive account of those countries and their inhabitants, from the earliest period of authentic history to the present time. In which the editor has treated not only of the historical events, but also of the manners, customs, religion, literature, and domestic habits of the people of those immense empires.

The embeltishments are about two hundred, and of the first order, illustrating whatever is peculiar to the inhabitants, regarding their dress, domestic occupations, their mode of agriculture, commercial pursuits, arts, &c. They are accurate, and each one has been made expressly for the work.

The volume forms a large octavo, containing between five and six hundred pages, printed in the best style, and on good substantial white paper. It is furnished to agents, handsomely bound in muslin, gilt, or leather, as the purchaser may prefer, at a very liberal discount, when quantities of not less than twenty copies are ordered at one time.

THRILLING INCIDENTS OF THE WARS OF THE UNITED STATES;

comprising the most striking and remarkable events of the Revolution, the French war, the Tripolitan war, the Indian war, the second war with Great Britain, and the Mexican war; with three hundred engravings! Retail price, \$2 50 per volume. Orders respectfully solicited. SEARS' PICTORIAL FAMILY PUBLICATIONS

SEARS' PICTORIAL FAMILY PUBLICATIONS are decidedly the best books that agents can possibly employ their time in supplying to the people of the United States. They are valuable for reference, and should be possessed by every family in this great republic. There is not a city or town in these United States, not even those of small importance, but contains many citizens to whom these works are indispensable. They are adapted to the literary wants of the Christian, the patriot, the statesman, and the domestic circle, got up in a superior style of art and workmanship; and are not only such books as will sell, but are such as an agent of good principle will feel free to recommend, and willing to see the purchaser again after they have been bought.

Our Plan—The plan the publisher has so successfully carried out for several years, is the obtaining responsible men as agents, who are well known in their own counties, towns, and villages, and have time and disposition to circulate good and instructive books among their neighbors and friends. Any person wishing to embark in the enterprise will risk little in sending \$25 or \$50, for which he will receive an assortment as he may direct, at the whole-sell cash prices.

The Baltimore and Philadelphia Steamboat

Company (ERICSSON LINE)

(ERICSSON LINE)

Have resumed their operations for the year with increased means of accommodating the trade between Philadelphia and Baltimore, in the most regular and expeditious manner, and at their former materially reduced prices, being, on dry goods, hardware, &c., only 10 cents per 100 pounds, and but half the price charged by other lines.

Persons wishing to avail themselves of the facilities and moderate prices of the Line, are advised to give explicit and positive directions for sending their goods to the Ericsson Line, and they should be particular to possess themselves of the receipts which are invariably given for their goods. In those are stated the price charged for transportation; and it will prove a protection against the double rates exacted by other lines, who have no published rates.

Goods destined for the West, South, or other places beyond Baltimore, forwarded promptly on the day of their arrival, with every care and attention, free of all charge whatever for this service, in the shape of commissions or otherwise.

New York—Goods shipped from New York, or other

whatever for this service, in the shape of commissions or otherwise.

New York.—Goods shipped from New York, or other places eastward of that city, should be distinctly consigned to A. Groves, jr., Philadelphia, to insure their conveyance by this Line.

Freight to or from Baltimore, as above, 10 cents per 100 pounds. Coarse freights taken at still less rates.

The established character and known reputation of this company is an ample guarantee to those disposed to confide their property to the care of the company.

One or more of the company's boats leaves Philadelphis from the upper side of Chestnut street wharf every day, (Sunday excepted.) at 3 o'clock, arriving in Baltimore early next morning. Apply in Philadelphia to

BY THOMAS S. DONOHO. Late in the night; and dimly Swift figures come and go, Where, under the broad trees sombre, The lamps their lustre throw

Over the sounding pavement, Returning home, each one, His long, long labor ended, Or the wild, loud revel done

And now and then, as passing, Two kindly voices greet, moment, and the footfalls Grow fainter on the street.

And some there be who wander, And scarce could answer where, Gazing up to the windows-For them no light is there!

But the summer stars are shining Sweet through the rifted cloud, Cheering the lonely passers, Alike the poor and proud. Life is a checkered pathway,

Though presently comes the shadow Of strange, gigantic gloom. And man, with labor wearied, Thinks of his pleasant rest; And he who is wild at the revel

Which joys awhile illume

Will scorn its highest zest And still dim forms are passing And friendly voices greet:

Then life grows faint, departing, Like footfalls on the street. And some, who wander, homeless. And steal away from the light-To them each door is mocking,

And a curse in each "Good-night! But-ever the stars of promise Shine through the rifted cloud And in OUR FATHER'S mansion Shall none be poor or proud! WASHINGTON, May, 1851.

THE EXPECTANT BRIDE. From "Hungarian Military Sketches."
[Concluded.]

The wedding guests were waiting. The bridegroom was there, in full uniform, glittering with gold, and the beauteous bride in her graceful robe of white lace. Yet a moment, and she would be his wedded wife.

The moment was very long.

The bridegroom awaited his adjutant's reurn from the execution. Until then, he would

ot approach the altar. What, if, at the very instant the solemn Yes: assed his lips, there reached his ears the rattle

of the life-destroying volley, which he, the thrice happy lover, had commanded. What, if, whilst God's servant implored Hea-ven's blessings on their union, the angry spirit f the criminal, invoking vengeance udge's head, appeared at the footstool of the Almighty!

Still no adjutant came. The bridegroom was uneasy. Yet uneasier "Perhaps," she whispered, "it were better postpone the ceremony."

" he replied, "to hasten it." A foreboding of evil oppressed them both. And still the adjutant came not. Two, three hours now elapsed beyond the appointed time. Noon approached—each minute seemed an eter-

At last hoofs clattered in the court. Hasty

"Remain without!" cried the bridegroom:

"No message of death do I bring," cried the officer hoarsely, "but a hundred times worse. The condemned man has taken the hussars away with him-all-towards the Hungarian frontier. A couple of leagues off they released me

"My horse!" shouted the bridegroom, hurrying madly to the door. But he paused, adly, at the sight of his bride, paler than ever, with terror in his glance.

"Wait but a moment, dearest love!" he said, clasped her to his breast, kissed her, and threw himself on his horse.

The animal resred beneath him, and would ot leave the court. The rider struck the spurs sharply into his flanks. Once more he looked back. There she stood, the beloved one, in her bridal dress, upon the balcony, and waved

her 'kerchief. "You will soon be back," she said. She never saw him again.

Forward raced the hussars upon their rapid ursers-forward, towards the blue mounains-ever forward. Through forest wilderness, over pathless

aths, up-hill and down-ever forwards to the distant mountains. Right and left, steepled cities appeared and

anished; the vesper bells greeted them as they passed: loudly neighing, their horses swept along—swift, and ever swifter. Amongst them rode the grey-headed man, guiding them by untrodden paths, over swamp

and moor, through silent groves of pine, forwards to the mountains. In the evening twilight they reached the anks of a handsome stream. Here and there on the distant hills glimmer the shepherds' fires: beyond those hills lies the Magyars' home. and in their valleys this stream takes its rise. Here, for the first time, they dismount, to water

If we succeed, yours the glory; if we fail the guilt is ours, since we compel you. Play your part! Defend yourself! Cut one or two of us from our saddles—the first who lays hand on your reins; see, I grasp it. Strike, Captain, and with a will!"

He did as he said and seized the horse's bridle; whilst on the other side an old sergeant haid hand on its mane. The horse stirred not.

The Captain gazed hard at them each in turn; but he raised not his sabre to strike.

Behind bim his forsaken bride, before him the mountain frontier of his native land. On the one a heaven of love and happiness; on the other, glory and his country's cause: two mighty passions striving against each other with a giant's force. The fierce conflict went nigh to overpower him; his head sank upon his breast. Suddenly blared the trumpets in rear of the squadron; at the martial sound his eager war-horse bounded beneath him. With awak-ening enthusiasm the rider raised his head and

waved his sabre. "Forward, then!" he cried, "in God's name! And forward he sprang into the river, the two hussars by his side; the cloven water plashing in pearls around their heads.

Forward! forward to the blue mountains! In lengthening columns, the hussars followed across the stream—the horses bravely breasting the flood, the bold riders singing their wild Magyar ditty. But dark and gloomy was their leader's brow, for each step led him farther from

numberless and nameless, illustrating the works of nature and of art. Six equilateral triangles, combined around one point as a centre, form a regular hexagon; a plane flat surface, with six equal sides and angles. This figure has very peculiar properties, exhibited in thousands of forms in mechanism of creation, as it is in works of art As two triangles combined form the rhombus, three of the latter figure, like six of the former, make a hexagon. The triangular hexagon, as formed of triangles, and the rhombic hexagon, as formed of rhombuses, together are capable of combinations uniting economy, strength, and cauty, sufficient for the employment of a whole life, becoming more interesting, rich, and beautiful at every step of progress in the work. The simplicity of such combinations fits them admirably for young hands, in which they work producing forms constantly new and increas- prepared.

> THE METHODIST CHURCH CASE .- For some time past a great deal of interest has been excited in this city by the legal arguments going forward before Judge Nelson in the dispute between the Northern and Southern divisions of the Methodist Church. These arguments have been marked by great force and ability, and are altogether worthy the importance of the case, altogether worthy the importance of the case, which relates, as most of our readers are no doubt aware, to the claims of the two divisions to the property belonging to the Church in general before the separation. The Southern division demands its share of that property on the ground not only of an equal original right, but of an agreement made at the time of the separation. The Northern division resists this demand on the ground that the agreement was unauthorized, illegal and not binding, and also unauthorized, illegal and not binding, and also that seceding portions of the church cannot carry out with them any part of the property, which is held in trust for specific uses, and without the right in any case to divide and restore it to the parties who originally contributed

> it, or to any body of them.
>
> While, without pronouncing an opinion on the legal merits of the case, we regard this lawsuit as unfortunate, and hope that it may yet be compromised on equitable terms for both parties, we cannot agree with the lamentations set up by some of our cotemporaries over the divi-sion of the church. It is true that these regrets are justified by high authority; Mr. Calhoun proclaimed the separation to be the snapping of one of the great cords which had before held the Union together, and Mr. Webster the other day expressed his fear lest the church might no longer prove so efficient a prop of religion and morality as before. But we cannot see the matter in that light. We do not believe that either the Union or religion and morality are more in danger of falling to the ground than when the Methodist church was combined under

> a single general conference. The schism came to a head some seven years ago, and this suit has been for some time before the courts. The discipline of the church contained certain restrictions intended to prevent the clergy from being slaveholders. At the South these were found inconvenient, and the desire and tendency was to neglect them and let them drop into disuse. At the North the old view of the sinfulness of man-owning was still entertained and even growing stronger. Thus the opinions of the two sections on a most important point of practical morality were in direct opposition, and the question was one in relation to which no compromise could be expected to prove satisfactory and end agitation for any great length of time. To endeavor to keep together would be to purpulate a state of disquiet fatal to the religious advancement of either party, and to the cause of the church in general. The subject was carefully and thoroughly deliberated, and the decision to separate seems to us a wise one. Now, each division an legislate for itself according to its expension and legislate for itself according to its expension. sion can legislate for itself according to its own light and interests, and we see not why amicable relations may not exist between them. No doubt it would be better for the two parties to remain together, were there no such discord of opinion; but as it is, we perceive no cause for

tears over their separation.

The sundering of religious denominations is too common in this country to excite alarm or justify anxiety. In fact it is a good thing that Two equilateral triangles combined form a we have so many denominations, and the for-rhombus, commonly called a diamond. UNION .- The Charleston Evening News has been sold out to parties who will conduct it on triangles. The tetraedron, though the most decided Union principles. Union papers are beginning to spring up right in the very hot-bed of secession. The people are beginning to think that the politicians have gone just far enough, and that their interests are no longer to be put in jeopardy to gratify the ambition of political leaders. Macaulay says, "calamity and peril often force men to combine, pros-perity and security often encourage them to separate." One of the coils of this country has been that it is too prosperous. It has grown so great under the Union that some begin to think it would grow still greater in separate States, but the calamities and perils of such an experiment impressing themselves with force upon the minds of right-thinking people will force them to combine to resist such suicidal attempts .- Phil.
